EXPERIENCE

DELOITTE CONSULTING

Manager, Cloud & Infrastructure, Chicago, IL **2016 – Present**

- Led global team to develop an automated cloud assessment model to intelligently analyze large application portfolios and determine cloud placement, migration method, and ROI recommendations to rapidly accelerate a cloud migration program
- Managed a team through analysis and design of an agile, cloud-based testing environment for a \$100B AUA insurance company to achieve improved testing accuracy and development speed
- Collaborated with business, IT, and finance stakeholders to develop a futuristic Bill of IT and operating model for a \$50B+ financial services organization to enable improved IT financial transparency for a \$3B IT budget

Senior Consultant, Cloud & Infrastructure, McLean, VA **2014 – 2016**

- Led cross-functional application and infrastructure team to assess and create a migration factory for a 1000+ application portfolio for a Fortune 20 technology corporation, increasing process efficiency and accelerating the journey to the cloud
- Designed and implemented a cloud / DevOps operating model for a \$300MM financial services engineering and operations organization to increase automation, reduce operating costs, and transform IT from a service provider to a strategic innovator
- Assisted with implementation of robotic process automation for a financial services client, reducing manual ticket resolution by 40%
- Designed and deployed a product management capability for a large insurance build/run organization and defined standard product offerings, service catalog, and private/public cloud pricing to enable transparency and self-service for the business

Consultant, Mergers & Acquisitions, McLean, VA **2012 – 2014**

- Oversaw the Active Directory, Exchange, and communication tools integration planning for a \$8.2B wholesale distribution merger to ensure a successful Day 1 transition and post-Day 1 inter-company communication
- Led M&A application separation planning activities for a wholesale distribution divestiture, developing detailed separation plans for each of the 600+ applications
- Deployed and configured a private cloud environment and oversaw the migration of key applications to the environment to achieve a successful, on-time separation for a \$2B oil and gas divestiture

Business Technology Analyst, Federal Data Center Infrastructure Optimization, Washington, DC **2010 – 2012**

- Performed data center migration and consolidation to a primary homeland security data center to achieve reduced costs through consolidation and simplification
- Managed virtualized data center infrastructure and Windows operations teams for a large government agency, ensuring infrastructure uptime and customer responsiveness
- Designed and implemented a virtual desktop infrastructure for a federal government agency to achieve increased security and flexibility for developers and testers
- Advised enterprise architecture decisions for a federal homeland security client to create agency-wide standards achieving reduced costs and increased simplicity
- Developed an repeatable manufacturing network architecture for a \$70B healthcare drug manufacturing business to reduce design and deployment costs for field sites
